## CA - Network

### Assignment - 1: Home network Topology

# Home Network Structure

## 1. Internet

- It comes from internet service provider (ISP) such as Jio, Airtel etc.
- Gives access to online services (websites, apps).

## 2. Modem

- It is connected to the internet.
- Transforms the internet signal for use within your home.

## 3. Wi-fi Router

- It connects to the modem.
- Provides internet to all devices in the home through: Wifi

## 4. Devices plugged into Router

- i) Laptop
- ii) Smartphones
- iii) Smart TV
- iv) Desktop
- v) Home theatre system

## 5. Access points

- It connected to the router via cable.
- Add additional wifi areas within the home (for better signal away from router).
